Crane Dance II

## Picture Description<sup>1)</sup>

Abstract, blurred photograph of construction cranes and city lights at night.

## Analysis<sup>1)</sup>

This abstract photograph captures the frenetic energy of a construction site at dusk or night. Several cranes are faintly visible through the blurring lights and building reflections, giving the impression of constant movement and urban development. The streaks of light, predominantly white and amber, create a dynamic interplay against the dark, undefined background, evoking a sense of speed and chaos.
