Breaking Night III

## Picture Description<sup>1)</sup>

An abstract long exposure shot of city lights at night creating blurred streaks of red, white, and blue.

## Analysis<sup>1)</sup>

This abstract photograph captures the frenetic energy of a city at night through intentional camera movement. Streaks of light, primarily in hues of red and turquoise, dance across the dark canvas, creating a sense of motion and chaos. Architectural structures, suggested by the linear patterns in the background, are blurred and distorted, contributing to the dreamlike quality of the photograph. The overall effect is a visual representation of the urban experience, evoking feelings of excitement, speed, and the constant flux of modern life.
