Traces on Black

Picture Description¹⁾

Abstract long exposure captures blurred city lights in vibrant colors against a dark background.

Analysis¹⁾

This photograph captures a dynamic and abstract cityscape at night, achieved through intentional camera movement and long exposure. The lights of the city are transformed into streaks of color, primarily blues, whites, and reds, creating a sense of motion and energy. The composition is dominated by these light trails, which form swirling and intersecting patterns against a dark background, suggesting the blur of traffic and the dazzling intensity of urban illumination. The overall effect is both chaotic and beautiful, offering a unique and impressionistic view of the modern metropolis.
