Bonbon Color I

Picture Description¹⁾

A mirrored street scene featuring buildings, parked cars, and a central perspective vanishing point.

Analysis¹⁾

This photograph presents a surreal and dreamlike cityscape, achieved through a manipulation of perspective and color. The central focus is a symmetrical street view, flanked by buildings that seem to mirror each other, creating a sense of distorted reality. The buildings are rendered in hues of pink and brown, contrasting with the patches of blue sky visible above. Cars line the street, blurred and elongated, adding to the sense of movement and disorientation. The overall effect is evocative of a memory or a fleeting impression, captured in a style that blends abstraction with photorealism.
