Tree Impression II

Picture Description¹⁾

Abstract blurred photograph with diagonal strokes of blue, white, and brown.

Analysis¹⁾

This abstract piece utilizes long, blurred strokes of color to evoke a sense of motion and light. Dominating the composition is a dark, almost black, shape on the left, possibly suggesting a tree or natural form. This contrasts sharply with the vibrant, lighter strokes on the right, which transition from gold and brown to lighter hues. The overall effect is one of dynamic tension between shadow and illumination, solidity and fluidity.
