Refected Sun I

Picture Description¹⁾

A black and white shot of a modern building facade featuring repeating vertical slats and reflective surfaces against a dark background.

Analysis¹⁾

This black and white photograph presents a dramatic upward perspective of a modern building facade. The structure is defined by a series of vertical, parallel slats that create a strong sense of linearity and depth. Light reflects off the sleek surfaces, adding highlights and visual interest. The dark background emphasizes the geometric shapes and architectural details, resulting in a photograph that is both abstract and structurally compelling.
