Black and White plus Black and Yellow II

Picture Description¹⁾

A three-story brick building with an attic level, featuring multiple windows decorated with striped cloths, some black and white and others yellow and black, and figures visible inside some of the windows.

Analysis¹⁾

This photograph presents a brick building facade, characterized by its gabled roof and symmetrical arrangement of twelve windows. Each window is adorned with striped textiles, alternating between black and white and gold and black patterns, creating a rhythmic visual sequence. In the lower left window, blurred figures of people are visible, suggesting an interior scene. The composition's strong lines and color contrasts draw the viewer's eye, highlighting the architectural details and adding a human element to the otherwise static structure.
