Shadows and Refections I

Picture Description¹⁾

A black and white photograph depicts a street corner with a 'Feuergasse' sign, casting a shadow on the white wall, and shadows of trees on the pavement.

Analysis¹⁾

This black and white photograph captures a street scene dominated by stark contrasts and geometric forms. A crisp white building facade occupies the left and upper right of the frame, punctuated by a rectangular window and a multi-paned door. A 'Feuergasse' sign, indicating a fire lane, stands prominently against the wall, its shadow stretching towards the corner of the building. The interplay of light and shadow creates a dramatic effect, with tree shadows cast across the pavement. The manhole cover sits embedded within a patch of lighter paving stones where it meets the corner of the building. The composition is meticulously balanced, drawing the viewer's eye through the frame.
