

# 010391

Wide Crosswalk I

## Picture Description<sup>1)</sup>

A black and white photograph of a person walking across a crosswalk at night.

## Analysis<sup>1)</sup>

This stark, high-contrast photograph captures a pedestrian crossing at night. The stark white stripes of the crosswalk dominate the foreground, bisected by the dark asphalt. A lone figure is captured mid-stride, illuminated by unseen light, their presence adding a human element to the otherwise abstract composition. The darkness surrounding the crosswalk emphasizes the starkness of the illuminated stripes, creating a dramatic play of light and shadow that evokes a sense of urban isolation and movement.
