Shadows on Tiles IV

Picture Description¹⁾

A black and white photograph captures the interplay of light and shadow, where a metal pole casts its shadow and the shadows of parallel bars onto a tiled ground.

Analysis¹⁾

This black and white photograph captures an abstract play of light and shadow on a tiled surface. A metal pole pierces the frame on the left, casting a bold, curved shadow that defines the foreground. Parallel lines of shadow, likely from a grating or fence, stretch across the tiles, creating a stark geometric pattern. The high contrast intensifies the texture of the paving stones, and the precise arrangement of light and dark forms an intriguing composition.
