Over Ulm XI

Picture Description¹⁾

A monochrome photograph captures the trails of an aircraft cutting through a partly cloudy sky.

Analysis¹⁾

This captivating black and white photograph presents a dramatic interplay of sky and man-made contrails. A vast expanse of dark sky dominates the upper left, creating a stark contrast with the billowing clouds that stretch diagonally across the frame. Two parallel contrails, bright and sharply defined, arc across the sky, their source barely visible as distant specks. The photograph evokes a sense of scale and the ephemeral nature of human impact on the vastness of the atmosphere.
