

# 012756

Over Ulm XII

## Picture Description<sup>1)</sup>

A monochrome photograph featuring contrails from aircraft crisscrossing a cloudy sky, contrasting against a dark background.

## Analysis<sup>1)</sup>

This black and white photograph captures a dynamic sky filled with contrasting textures and forms. A dark, almost solid, expanse of sky occupies the upper left corner, sharply defined against a field of billowing clouds. Two distinct contrails, appearing as crisp white lines, arc across the frame, adding a man-made element to the otherwise natural scene. The clouds themselves range from delicate, wispy formations to denser, more substantial masses, creating a layered and complex composition. The overall effect is one of tension and beauty, highlighting the interplay between natural phenomena and human impact on the environment.
