Berlin Sky

## Picture Description<sup>1)</sup>

A low-angle black and white photograph of buildings framing a bright, overcast sky.

## Analysis<sup>1)</sup>

This stark black and white photograph captures a claustrophobic yet strangely liberating view upwards between imposing buildings. The composition, shot from a low angle, emphasizes the height and decaying grandeur of the structures, their walls lined with windows like watchful eyes. The narrow strip of sky, a bright rectangle, offers a sense of escape, contrasting sharply with the heavy darkness that envelops the surrounding architecture. The grainy texture and high contrast add to the image's unsettling and evocative atmosphere, suggesting a forgotten corner of urban life, steeped in history and silent observation.
