

# 013726

Zinglerstrasse

## Picture Description<sup>1)</sup>

A black and white cityscape captures two pedestrians walking on a bridge alongside a road with a car driving towards the camera.

## Analysis<sup>1)</sup>

This black and white photograph captures a street scene in an urban setting. The composition is divided between the architectural structures on either side of the street and the road itself. On the left, an older woman wearing a hat and coat walks along a raised sidewalk, while a man in a jacket walks slightly ahead. The architecture on the left is dominated by a large, multi-story building with numerous windows. On the right, a car drives down the street, following the curve of the road and a directional arrow painted on the asphalt. The buildings on the right are of a different architectural style, with varying rooflines and window designs. The overall tone is one of quiet urban life, with the textures of the buildings and road surfaces adding to the image's depth and complexity.
